third quarter ☉ October 28 [17]
new ● November 4 [24]

Samhain November 6 – winter begins

~ Winter ~

Blood Month ☉ November 10
full ☉ November 18 [9]
third quarter ☉ November 26 [17]
new ● December 3 [24]

The Old English calendar is a superposition of solar events and lunar months.
The year begins with Yule (the winter solstice).
The months begin with the first quarter moon and the days begin at sunset.
The dates are based on the day that begins at sunset in Greenwich, England.
The numbers in brackets are the days of the month.
